Reviews

Great electronic book and useful one. It can be written in straightforward terms rather than difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

Our past work has also identified a number of challenges to DODs efforts Challenges to DODs in undertaking environmental cleanup activities at defense sites, including Environmental BRAC sites. For example, we have reported the following: Cleanup Efforts DODs preliminary cost estimates for environmental cleanup at specific sites may not reflect the full cost of cleanup. That is, costs are generally expected to increase as more information becomes known about the extent of the cleanup needed at a site to make it safe enough to be reused by others. We reported in 2007 that our experience with prior BRAC rounds had shown that cost estimates tend to increase significantly once 18 more detailed studies and investigations are completed. Environmental cleanup issues are unique to each site. However, we have reported that three key factors can lead to delays in the cleanup and transfer of sites. These factors are (1) technological constraints that limit DODs ability to accurately identify, detect, and clean up unexploded ordnance from a particular site, (2) prolonged negotiations between environmental regulators and DOD about the extent to which DODs actions are in compliance with environmental regulations and laws, and (3) the discovery of previously undetected environmental contamination that can result in the need for further cleanup, cost increases, and delays in property transfer. In conclusion, Mr. Chairman, while the data indicate that DOD has made progress in cleaning up its contaminated sites, they also show that a significant amount of work remains to be done. Given the large number of sites that DOD must clean up, we recognize that it faces a significant challenge. Addressing...
