

# Elliptic Curves, Hilbert Modular Forms and Galois Deformations

Filesize: 5.9 MB

## Reviews

*Completely among the finest book I have actually read through. It is probably the most remarkable book we have study. I discovered this book from my dad and i suggested this book to learn.*

## ELLIPTIC CURVES, HILBERT MODULAR FORMS AND GALOIS DEFORMATIONS

DOWNLOAD

To get **Elliptic Curves, Hilbert Modular Forms and Galois Deformations** PDF, make sure you refer to the link below and download the file or gain access to additional information that are have conjunction with ELLIPTIC CURVES, HILBERT MODULAR FORMS AND GALOIS DEFORMATIONS book.

Springer Basel. Paperback. Book Condition: new. BRAND NEW, Elliptic Curves, Hilbert Modular Forms and Galois Deformations, Laurent Berger, Gebhard Bockle, Lassina Dembele, Mladen Dimitrov, Tim Dokchitser, The notes in this volume correspond to advanced courses held at the Centre de Recerca Matematica as part of the research program in Arithmetic Geometry in the 2009-2010 academic year. The notes by Laurent Berger provide an introduction to  $p$ -adic Galois representations and Fontaine rings, which are especially useful for describing many local deformation rings at  $p$  that arise naturally in Galois deformation theory. The notes by Gebhard Bockle offer a comprehensive course on Galois deformation theory, starting from the foundational results of Mazur and discussing in detail the theory of pseudo-representations and their deformations, local deformations at places  $l \neq p$  and local deformations at  $p$  which are flat. In the last section, the results of Bockle and Kisin on presentations of global deformation rings over local ones are discussed. The notes by Mladen Dimitrov present the basics of the arithmetic theory of Hilbert modular forms and varieties, with an emphasis on the study of the images of the attached Galois representations, on modularity lifting theorems over totally real number fields, and on the cohomology of Hilbert modular varieties with integral coefficients. The notes by Lassina Dembele and John Voight describe methods for performing explicit computations in spaces of Hilbert modular forms. These methods depend on the Jacquet-Langlands correspondence and on computations in spaces of quaternionic modular forms, both for the case of definite and indefinite quaternion algebras. Several examples are given, and applications to modularity of Galois representations are discussed. The notes by Tim Dokchitser describe the proof, obtained by the author in a joint project with Vladimir Dokchitser, of the parity conjecture for elliptic curves over number fields under the assumption of finiteness...
